Skills

- Languages: C++, JavaScript, HTML, CSS
- Databases: MongoDB, MySQL
- Technologies/Framework: TailwindCSS, Bootstrap
- Backend Technologies: Express.js, Node.js

Projects

BrainTap

March, 2025

- Built an interactive BrainTap Game using HTML, CSS, and JavaScript to improve memory retention through color-sequence repetition gameplay.
- Implemented core game logic in vanilla JavaScript including pattern generation, user input handling, and real-time validation.
- Designed a responsive and visually appealing UI using CSS, enhancing user experience across different screen sizes.
- Used event listeners and dynamic DOM manipulation to provide real-time feedback (animations) based on user actions.

HomeX – Rental Booking Platform:

April 2025

- Developed a full-stack vacation rental platform using the MERN stack to support dynamic listings, bookings, and user authentication.
- Implemented features like property uploads, location-based search, date-based availability, and user dashboards for hosts and travelers.
- Technologies: MongoDB, Express.js, Node.js, TailwindCSS

Education

- **Bhagwan Parshuram Institute of Technology (BPIT)**
- *Bachelor of Technology - Information Technology (IT); GPA: 8.48*
- **Mayo International School**
- *Higher Secondary Education, Grade: 86.2%*

Delhi, India
