PROFESSIONAL SUMMARY

MERN stack developer with hands-on experience building and shipping two full-stack web applications covering authentication, REST APIs, and database design. Solved 200+ problems on LeetCode with a strong foundation in data structures, algorithms, and C++. Comfortable working across the stack — from responsive React interfaces to Node.js/Express APIs backed by MongoDB — and looking for an SDE / Full-Stack Developer role to apply and grow these skills.

EDUCATION

Bhagwan Parshuram Institute of Technology — B.Tech | CGPA: 8.45/10 (80.4%)

Mayo International School — Class XII (CBSE) | 86.2%

Salwan Public School — Class X (CBSE) | 87.4%

TECHNICAL SKILLS

Languages	C++, JavaScript
Frontend	HTML, CSS, Tailwind CSS, React.js
Backend	Node.js, Express.js
Database	MongoDB, Mongoose
Tools & Concepts	REST APIs, JWT Authentication, Git, GitHub
Core CS	Data Structures & Algorithms, Problem Solving

PROJECTS

CampusTrack : *React.js, Node.js, Express.js, MongoDB*

- Developed a full-stack student academic management system where teachers create and manage tasks and attendance, while students track pending work from a centralized dashboard.
- Built REST APIs with Node.js and Express.js, and designed MongoDB schemas to store tasks, attendance records, and user roles for students and teachers.
- Implemented subject-wise attendance percentage calculation and a task status tracker (pending/completed) with an overdue-task view on the student dashboard.

JobPilot : *React.js, Node.js, Express.js, MongoDB, JWT*

- Developed a full-stack job application tracker with React.js and Express.js REST APIs, supporting create, edit, delete, and view operations on job/internship applications stored in MongoDB using Mongoose.
- Implemented JWT-based authentication and protected API routes to ensure each user can access and manage only their own application data.
- Designed search and filter functionality along with status management (Applied, Assessment, Interview, Selected, Rejected) and a dashboard displaying application statistics.

ACHIEVEMENTS & EXTRA-CURRICULAR

- Solved 200+ data structures and algorithms problems on LeetCode, building a strong foundation in problem-solving and coding efficiency.
- Built and personally deployed two full-stack MERN applications end-to-end — from database schema design to frontend UI.
- Actively maintain public repositories on GitHub, documenting project code and progress.
